Boy's Vest

TSM-735

This pattern is for three styles of vest: a military style (replicating that of the soldiers), a high button vest and a V-necked mid-height vest. Optional welt pockets can be added, if desired. The back of the vest is straight across and designed to come even with the waistband of the trousers. The vest can be adjusted using a buckle and belt in the back, so it can be made with room for growth. Depending on the fabric chosen this style of vest would have been worn from the early 50's through the early 1900's.
